DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4-7, 14, 15, 17, 19 and 20 are rejected under 35

U.S.C. 102(e) as being anticipated by Thompson. The above claims broadly claim a transistor device whereby the threshold voltage of the device may be dynamically adjusted. The reference to Thompson also teaches adjusting the threshold voltage of transistor devices, using at least in part, a bias voltage across the gate and source of the device.

For example, as described in [0043] and [0048], the transistor device of Thompson may have its threshold voltage adjusted, at least in part, by means of adjusting a supply voltage to change an applied back gate voltage. Furthermore, as discussed in [0048], these supply voltage adjustments (which, in turn, change the back gate voltage, and ultimately the threshold voltage of the device), may be made "on the fly", which would result in a dynamically adjustable threshold voltage, as claimed.

Allowable Subject Matter

Claims 8-13 are allowed.

Claims 3, 16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
